# SKI GUIDE

(OREGON & WASHINGTON)

## OF INTEREST TO SKIERS

The National Forests are administered by the Forest Service, a bureau of the Department of Agriculture, to bring about the greatest good to the greatest number in the long run. In addition to priceless recreation, other resources of these mountainous areas are: TIMBER for homes and thousands of other uses; WATER for domestic use, irrigation and power; RANGE for cattle, sheep and most of the wildlife of the region.

National forests occupy over 22% of the area of Oregon and Washington. Since the snowfall is greatest in the higher mountain sections where most of the forests are situated, over 90% of the developed winter sports areas in the two states come under the jurisdiction of the U. S. Forest Service.

Skiing is now the third greatest recreation activity in the region, being exceeded only by camping and picnicking.

The major ski areas are situated along yearlong routes of travel. Other fine areas are available to those who wish to leave the beaten paths and ski into them. Ski area development work on the national forests started with the CCC Program, and has been continued with the help and cooperation of ski clubs, ski patrols, and national forest permittees.

Opportunities for building ski lodges are available to ski clubs near all major winter sports areas in the national forests.

112127

All ski concessions are operated by private concerns with reasonable prices being charged for ski rentals, food, lodgings, and tow rides. Rates or prices may be obtained by writing to operators listed on pages 17-26.

Ski schools operating on national forest lands are required to have instructors certified by the Pacific Northwestern Ski Association.

### CONTENTS

	<u>PAGES</u>
1. Facilities - Washington areas	3 to 8
- Oregon areas	9 to 16
2. Tow Operators - Washington areas	17 to 21
- Oregon areas	21 to 26

## SKIING LOGIC

For the keenest enjoyment of skiing:

1. Exercise and strengthen the muscles most subject to strain BEFORE THE FIRST SNOWFALL. It's a strenuous sport.
2. Get the proper equipment, particularly boots and bindings.
3. Begin the season with lessons under competent instructors.
4. Learn control and use it, for it is the hallmark of the good skier. A controlled fall is a safeguard.
5. Don't ski difficult terrain until you can ski any practice hill under control.
6. DON'T SKI ALONE.

To increase the pleasure of skiing for all:

1. Give the other skier a fair break by filling your own sitzmarks and footprints.
2. Climb skiing surfaces only on skis and don't linger in the middle of the trail on blind corners.
3. Heed the cry "track". The other skier may be out of control and need all the room he can get. The slower moving skier always has the right of way.
4. Cooperate with all Ski Patrolmen. They are volunteers ready to help you if you need them.

Safety in skiing is mainly a combination of common horse sense and good sportsmanship.

The National Ski Patrol System
